VersionOne's Winter 11 Released

Press Release

Posted by:

Posted on : 2011/2/1 23:34:18

VersionOne Winter ‘11 provides enhancements to a variety of features including: Epics, Roadmapping, Conversations, and Custom Fields.

Release Highlights

* Easier Backlog Management using Epics
Filtering by specific epics has been added to grid views in this release. Finding stories and backlog items related to individual epics will be much easier for Product Owners and team members managing the delivery of value spread across related stories.

* Roadmapping Integration Ties Strategy to Delivery
Tighter integration between roadmaps and specific project stories and tasks means better alignment between strategy and team effort. Search for and link to existing stories and epics, and see overall progress against related items directly from your roadmaps.

* Custom Field Synchronization Makes Reporting Even Easier
When using Analytics or the Data Mart, custom fields will now automatically synchronize and be available for reporting. Reporting and administration just got a whole lot easier.

* Performance Improvements
Building on performance improvements delivered in the last releases, page load times, especially for data-heavy pages, have been further improved.

About VersionOne

VersionOne is recognized by agile practitioners as the leader in agile project management tools. By simplifying the planning and tracking of agile projects, we help teams deliver better software faster. Since 2002, companies such as Adobe, Boeing, bwin, Intuit, Lilly, Lockheed Martin, McKesson, Oppenheimer, Qualcomm, Sabre and Siemens have turned to VersionOne. Today more than 30,000 teams from over 170 countries use VersionOne. Agile Made Easier @ VersionOne.com.
