GreenHopper 5.10 introduces of a brand new user experience for teams managing Agile projects. Our team went back to square one and reinvented GreenHopper to provide the best planning, executing and reporting tool for Scrum and Kanban teams.

By creating a new board in GreenHopper 5.10, Scrum teams can now:

- * Plan work across multiple JIRA projects
- * Track Sprints separate from releases (Fix Versions)
- * Report on scope change in the burndown chart
- * Get started quickly with a Scrum preset

Other highlights from this release include:

- * Users are prompted to resolve a Story once all Sub-Tasks have reached the Done column,
- * Teams can visualise sprint dates alongside team leave, retrospectives and planning meetings using the Team Calendars integration, and
- * Teams can estimate using time or any number field they choose

About Atlassian

Atlassian products help innovators everywhere plan, build and launch great software. More than 20,000 large and small organizations – including Citigroup, eBay, Netflix and Nike – use Atlassian's issue tracking, collaboration and software-development products to work smarter and deliver quality results on time.
