Salt Lake City – August 10, 2011 – VersionOne, recognized by agile practitioners as the leader in agile management tools, and LeanKit, maker of LeanKit Kanban, today announced a strategic partnership to offer an integrated solution providing sophisticated support for teams implementing Kanban.

Since its launch in 2002, VersionOne has led the market in supporting multiple agile methods in a single tool enabling broader organization-wide visibility and reporting. Through this partnership, VersionOne will offer an integrated solution delivering best-of-breed agile and Kanban lifecycle management.

This partnership will allow VersionOne to extend and enhance the core Kanban functionality within the VersionOne product to support teams needing more advanced Kanban workflow, analytics and reporting while allowing organizations to continue to benefit from VersionOne’s overall enterprise ALM solution.

About VersionOne

VersionOne is recognized by agile practitioners as the leader in agile project management tools. By simplifying the planning and tracking of agile projects, we help teams deliver better software faster. Since 2002, companies such as Adobe, Boeing, bwin, NASDAQ, Lilly, Lockheed Martin, AAA, Qualcomm, Sabre and Siemens have turned to VersionOne. Today more than 30,000 teams from over 170 countries use VersionOne. Agile Made Easier @ VersionOne.com.

About LeanKit

Since 2009, industry experts have recognized LeanKit as the leader in Kanban tooling. LeanKit provides teams with flexible, easy to use visual management – as easy as sticky notes on a whiteboard. Managers can access sophisticated metrics that enable evolutionary process improvement. LeanKit brings the simple power of Kanban to the globally distributed enterprise.
