Parasoft, industry leader in Development Testing, and Electric Cloud®, a leading DevOps optimization company, today announced a partnership to help organizations greatly reduce risks associated with rapidly delivering and continuously evolving software.

To accelerate the delivery of top-quality software, the new joint solution marries Parasoft's Development Testing platform — which centralizes a broad spectrum of automated quality practices from static analysis, to unit testing, to peer code review — with Electric Cloud's proven technologies for automating and accelerating the application development and delivery process. The result is a solution that optimizes the Development Testing process for continuous integration and delivery of secure, reliable software that satisfies stakeholder expectations.

"Ensuring quality in an Agile development environment is complex and at times difficult," explained Wayne Ariola, vice president of strategy for Parasoft. "There are many challenges that force both development and QA to make trade-off decisions versus the clock. With Electric Cloud's solutions, organizations are able to automate and accelerate their testing activities by leveraging dynamic and scalable cloud infrastructures. Parasoft finds that our mutual clients not only achieve more aggressive quality goals, but also execute their test plans in significantly less time."

According to Electric Cloud's vice president of marketing, Kalyan Ramanathan, "Agile requires rapid feedback on software quality. While Development Testing can improve the quality of the delivered software, given today's complex software applications, enterprises struggle to run these tests quickly and often. By closely partnering with Parasoft, we've created an integrated solution that helps customers achieve dramatic test runtime acceleration, enabling customer to improve developer productivity by increasing the frequency of testing and identifying issues much faster." “

About Parasoft

For 25 years, Parasoft has researched and developed software solutions that help organizations deliver defect-free software efficiently. By integrating Development Testing, API/cloud/SOA/composite app testing, and service virtualization, we reduce the time, effort, and cost of delivering secure, reliable, and compliant software. Parasoft's enterprise and embedded development solutions are the industry's most comprehensive—*including static analysis, unit testing with requirements traceability, functional & load testing, dev/test environment management, and more*. The majority of Fortune 500 companies rely on Parasoft in order to produce top-quality software consistently and efficiently. For more information, visit <http://www.parasoft.com>.

About Electric Cloud

Electric Cloud delivers solutions that automate and accelerate the application development and delivery process. The company's award-winning products help development organizations to

speed time-to-market, boost developer productivity, and improve software quality while leveraging the operational efficiencies provided by virtualized/cloud infrastructures. Leading companies across a variety of industries, including financial services, ISVs, mobile devices, semiconductors and transactional websites rely on Electric Cloud's automation solutions.
