Inflectra announced the full release of SpiraTest, SpiraPlan and SpiraTeam v4.0. This new version includes a major update to the user interface, support for mobile devices (iPod, iPad and Android), enhanced custom properties and workflows and a new custom report generator.

New Features:

- * Support for thirty (30) custom properties per artifact and additional property types (date, user, multi-list, rich text, etc.)
- * Ability to raise incidents and add discussion comments from inbound emails
- * Cross-project resource allocation and leveling capabilities
- * Redesigned user interface with enhanced usability and performance
- * Ad-hoc report generator and cross-project reporting capabilities
- * Mobile web browser (iOS, Windows Phone, Android) support for executing test cases on smartphones and tablets
- * Enhanced permission system with more customizable and granular user roles / permissions
- * Support for displaying data in different timezones depending on user preferences
- * Support for user avatars within enhanced discussion thread system

About Inflectra

Inflectra is a privately held software company dedicated to helping our customers - large corporations, small businesses, professional services firms, government agencies and individual developers - with the means to effectively and affordably manage their software development lifecycles, so as to decrease the time to market and increase return on investment. We are headquartered in the growing technology community of Silver Spring, Maryland located just outside Washington, D.C. Visit <http://www.inflectra.com/>
