

Agile Software Test Analyst, Whitney Bradley and Brown , Washington, DC Jobs

Posted by:

Posted on : 2013/7/8 7:35:27

The lead software testing provides support to agile development teams, as well as legacy DHS waterfall Systems Engineering Lifecycle (SELC). Testing will concentrate on User Interfaces and Database Applications.

Perform trade-off analysis and recommendations for open source and commercial-off-shelf automated testing tools that satisfy requirements for efficiency, ease of integration, and minimizing cost to the government. Provide technical leadership for implementation of selected automated test tools.

Coordinate and communicate with Program Manager, Senior Technical Program Manager, and application development teams, especially with regard to communicating standards and best practices, and providing feedback about testing program.
