Inflectra is pleased to announce the release of RemoteLaunchX, the new cross-platform version of RemoteLaunch. This new version of the system is written 100% in Java and can be used on different environments including: Linux, UNIX, MacOS X and Windows. This new version is available at no charge to all existing RemoteLaunch customers.

RemoteLaunchX includes support for existing command-line applications on different platforms and reporting the results automatically back into either SpiraTest or SpiraTeam. The system allows testers to specify custom regular expressions for parsing the output of automated test frameworks to more accurately determine the execution status and outcome.

SpiraTest is a powerful Requirements and Test Management solution that manages a software project's requirements, scope, use-cases, tests, releases and bugs and issues in one environment, with complete requirements traceability throughout. Customers can track every bug or issue back to the test case and test step that being executed, and from there back to the underlying requirement needing fulfillment.

SpiraTeam is an integrated Application Lifecycle Management (ALM) system that manages your project's requirements, releases, test cases, issues and tasks in one unified environment. SpiraTeam contains all of the features provided by SpiraTest - our highly acclaimed quality assurance system and SpiraPlan - our agile-enabled project management solution. With integrated customizable dashboards of key project information, SpiraTeam allows you to take control of your entire project lifecycle and synchronize the hitherto separate worlds of development and testing.

About Inflectra

Inflectra is a privately held software company dedicated to helping its customers - large corporations, small businesses, professional services firms, government agencies and individual developers - with the means to effectively and affordably manage their software development lifecycles, so as to decrease the time to market and increase return on investment. Inflectra is currently headquartered in the growing technology community of Silver Spring, Maryland located just outside Washington, D.C. Visit <http://www.inflectra.com/>
