Fresh new Firebug 2 has just been released. Firebug is an open source project that integrates with Firefox to put a wealth of web development tools at your fingertips while you browse. You can edit, debug, and monitor CSS, HTML, and JavaScript live in any web page

Firebug 2 introduces many new features and bug fixes also because we completely removed dependency on the ancient Firefox debugging engine (aka JSD1) and incorporated new debugging engine known as JSD2.

- * Syntax Highlighting
- * Pretty Print
- * DOM Events Inspector
- * Searching in the HTML Panel
- * Code Auto Completion
