

Product Owner, Software Development, Rosetta Stone , Boulder, CO Jobs

Posted by:

Posted on : 2010/11/1 9:20:18

Responsibilities:

- * Define product features and requirements for Rosetta Stone's internal, reusable software components.
- * Prioritize development of new features, enhancements, and bug fixes in the Product Backlog.
- * Collaborate with a broad group of stakeholders to develop and maintain short-range and long-range product development plans.
- * Collaborate with the software development team to clarify requirements and iteratively develop software products.
- * Collaborate with the Product Owners of other development teams to define and implement scalable solutions.
- * Collaborate with the Product Owners of other development teams to gather and analyze customer data (from software developers) to inform product definition and prioritization efforts
