Here we go again! Banking on the success of the first two “XP Day – Edition Suisse”, the organizing committee has decided to go back to work and launch a call for submission for the 2011 edition. The fundamental rules have not changed: if you want to share your experience or knowledge about agility, to debate on some new idea or to bring forth anything that can contribute to agility, we need your contribution.

Edition 2011 of the XP Day Edition Suisse is your opportunity to express yourself on the following, various subjects:

- Project management,
- Tools,
- Practices,
- Customer contracts,
- Transitions toward agile methodologies,

And more! Like we did last year, we want to privilege workshops and interactive sessions over other types of presentations. For this new edition, an open-space room will be booked to organize impromptu discussions or hand-on workshops. Submissions must be received before or on March 20th, 2011 at the latest. More information and submission form on
