

Agile Java Software Engineer, SuccessFactors, San Mateo, CA

Jobs

Posted by:

Posted on : 2012/3/16 8:31:59

The Emerging Product development teams work on innovative and ground-breaking products designed to take Performance and Talent Management to the next level and we are currently looking for top tier development talent with the brains and passion needed to raise the bar.

Tired of the same old? Say goodbye to painful waterfall processes and boring outdated technologies and hello to Agile development and leading edge commercial and open source Java + J2EE technologies such as Seam, Hibernate, AJAX, Lucene, YUI, Flex to mention but a few. Come join a world class development team where you can learn from some of the sharpest minds in SaaS and where the results of your development efforts will make a difference in the lives of 6+million people in 185 countries and in 31 different languages
