GreenHopper adds Agile project management to any JIRA project. Whether you're a seasoned expert or just getting started with Agile concepts, GreenHopper is perfect for visualizing your existing process and stimulating incremental improvement.

Atlassian announced the release of GreenHopper 5.9.1, delivering the following enhancements to the Rapid Board:

- * Stories (ie. issues) can now be added to an in-progress sprint — drag and drop the issue in Plan mode onto the active sprint.
- * Quick Filters are now available in Plan mode.
- * Attachments are now visible in the Detail View (e.g. useful when you are in a sprint planning meeting).
- * Sub-tasks are now visible in Work mode.

This release also includes a number of fixes.
